Gaindakot-13, Nawalparasi

PROFILE

I am a dedicated web developer with over a year of experience in crafting digital solutions. I specialize in Laravel, React, Bootstrap and Tailwind CSS, and I'm enthusiastic about Android app development using Java. Currently pursuing a BCA Bachelor's Degree and in my seventh semester, I am committed to delivering user-centric designs and elegant code. My skill set encompasses a range of web development technologies, making me a valuable asset for effective project contributions.

PROJECTS

Evergreen Nepal

Simple marketplace site built using Laravel. I used Tailwind & Bootstrap for frontend. I also used Chart.js and Livewire.

FoodRhino

Food ording site for multi restaurants with minimal features built using Core PHP and Bootstrap.

Appointment Manager

It is built using Laravel. Integrated OpenStreetMap for enhanced visual tracking.

Netflix clone

I create a simple clone of Netflix. It is built using React.js.

Project Manager

I create simple APIs with Sanctum authentication. It is used for student registration, login and CRUD operations of projects.
